

SECTION 22. ODORS 22-1

SECTION 22. ODORS

The clearing and construction phases of the project will not create significant odors. Only limited, short-term odors may be generated by exhaust from harvest/construction equipment and limited brush burning.

Clearing will be performed utilizing standard forestry equipment under controlled conditions. A construction supervisor and environmental inspector will ensure that any brush burning will be conducted in a closely supervised situation. All burning will be accomplished in compliance with local and state open burning permit requirements.

There are no odors associated with operation of an electric transmission line.
